Use Cases of NFT

NFT Wallets

NFT MarketPlace

WHAT IS AN NFT ?

It is basically a special type of token generated through cryptographic hashing methods and leverages blockchain technology for linking with a unique digital asset that could not be replicated. NFT was created by Kevin McCoy and Anil Dash in 2014.

Jack Dorsey sells his first tweet ever as an NFT for over \$2.9 million

NFT WALLETS

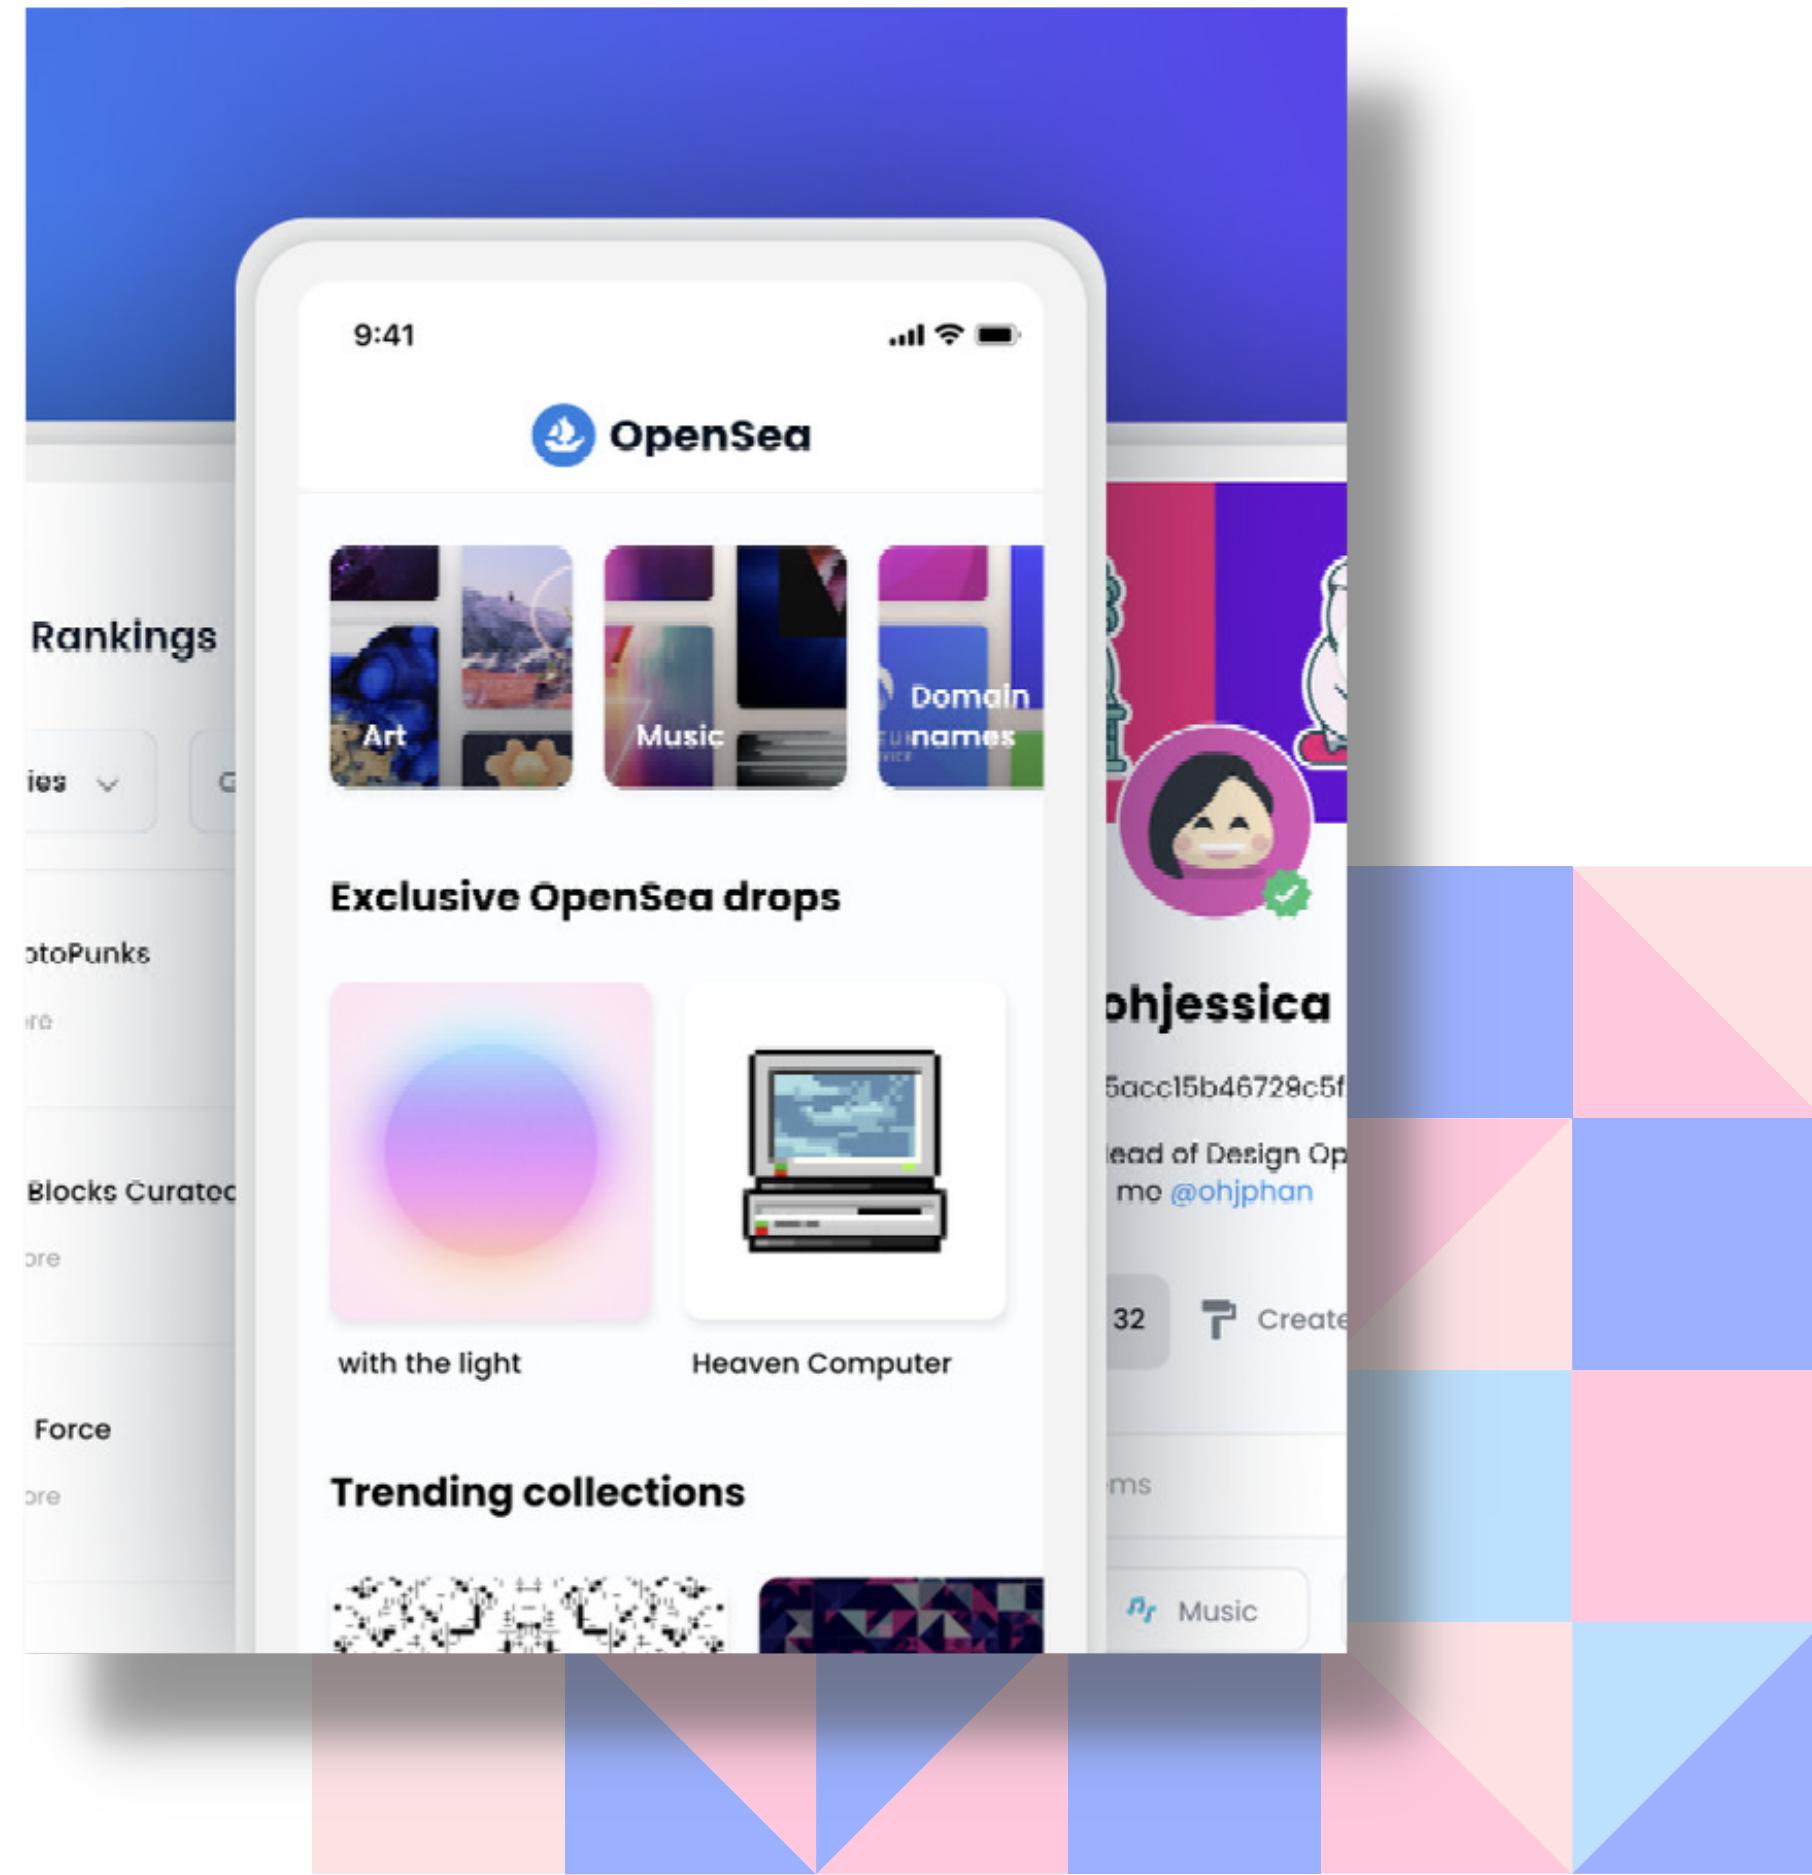

An NFT wallet is a cryptocurrency wallet that supports the blockchain protocol NFTs are built on. It also needs to support the currency you'll buy NFTs with, such as Ether (CRYPTO:ETH). Since the vast majority of NFTs use the Ethereum blockchain, most Ethereum wallets will work.

How to Buy NFTs?

NFT MARKETPLACE

An NFT marketplace is your gateway to participating in the purchase and sale of these digital assets -- from art to music to entire virtual worlds. Think of NFT marketplaces as your Amazon of the digital realm
